

# **Fatal Alert**

On July 8, 2022, an employee at a long-term care facility had a cardiac event. The cardiac event was noticed immediately and two person CPR was started by Resident Nurses. After the arrival of emergency services, the employee was transported to the local hospital where attempts to revive him were unsuccessful.

## **Significant factors**

- Employer was unaware of the OSHA policies regarding reporting a work-related fatality.

## **Recommendations**

- Employer needs to train employees on OSHA policy regarding reporting of employee injuries and fatalities.
